

Kobad Bhavnagri is a leading expert on the energy transition. He is the Global Head of Industrial Decarbonization for BloombergNEF, an independent research house specialising in the future of energy. He oversees the firms work on hydrogen, carbon capture and storage, heat electrification and the circular economy.

Kobad was previously BNEF's Global Head of Special Projects, and lead author of the *Hydrogen Economy Outlook*. Prior to that, he was BNEF's Head of Australia and Head of Asia-Pacific Economics and Policy. He has authored over 100 publications spanning energy policy, economics, finance and technology since joining the company in 2010.

Kobad is also a Non-Executive Director of the Carbon Market Institute, an Adjunct Senior Lecturer in the faculty of Engineering at the University of New South Wales and a member of the Australian Government's Energy Industry Roundtable. He has worked in the energy and finance industries since 2003 as an engineer, management consultant and analyst, and has a first class honours degree in Mechatronic Engineering from the University of New South Wales.
