

Dr John K Ward, Ph.D.

John Ward is the Research Director of the Energy Systems Research Program at the CSIRO in Australia – leading research into Australia’s national energy challenges – from building thermal physics, behavioural science and energy efficiency through to electricity system optimization, solar forecasting and energy storage. John is the Australian technical lead for a range of international collaborations – including IEA IGGAN, Mission Innovation & the Global Power System Transformation (G-PST). He is heavily involved in Australian standards development related to integrating inverter based resources into the electricity system.

Energy Systems Research Director, CSIRO

Member, Australian Standards committees: EL-005, EL-042, EL-054, EL-064

Australian Executive Committee Member, IEA ISGAN

Australian Technical Lead, Mission Innovation 2.0, Green Powered Future

Australian Technical Lead, G-PST

Chair, IRED2022 Conference

2002 Ph.D. The University of Newcastle, Australia

2002 - CSIRO Energy, Australia
