

Trinayana Kaushik works as a Research Associate in the Centre for Resource Efficiency and Governance (CREG) at The Energy and Resources Institute (TERI). She has a background in Chemistry and Climate Science and Policy. She is part of projects where she is conducting Comparative Life Cycle Assessment (LCA) of products and processes across sectors. She is also part of the India Australia Collaboration project for plastic waste and is working towards preparing a Multiregional Input-Output (MRIO) table for polymers in different Indian sectors. Her primary area of work is conducting Environmental Sustainability assessment using LCA as a tool and she has authored articles on the similar and relevant topics in several organizational newsletters as well as is published in seminar journals.
