

Sary AWAD, Ph.D.

Professor at IMT Atlantique, GEPEA UMR-CNRS6144. He holds a Ph.D. in Energy and Process Engineering from Nantes University since 2011. He has integrated the academic staff of IMT Atlantique in September 2012. His research focuses on energy recovery from biomass and organic wastes, and the efficiency of energy systems and sustainable biofuels production processes. He is coordinating, since October 2023, the Horizon Europe funded project COCPIT that deals with biorefinerie concept for the production of sustainable aviation and maritime fuels from microalgae. He is also the head of the MSc. Program in process and bioprocess engineering PM3E (Project Management for Environmental and Energy Engineering) since 2021.
